

## Product Overview:

**RM3272S** is a high-precision AC/DC converter controller of CC/CV PSR.

**RM3272S** integrates high-voltage power MOSFET, suitable for high-performance, compact charger and adapter. Because the chip works in primary detection and control mode, it does not require optocoupler and TL431.

**RM3272S** provides comprehensive protection functions, including VDD under voltage protection (UVLO), cycle current protection (OCP), VDD over voltage protection (OVP), over temperature protection (OTP), output short circuit protection (OLP), and CS open / short circuit protection (CS O / SP) and so on.

**RM3272S** is offered in SOP-8 package.
